ЗВІТ

про виконання лабораторної роботи №9

з дисципліни

«Спеціалізовані мови програмування»

Виконав:

студент гр. ІТ-32

Федик В.А

Прийняв:

доц.каф. ІСМ

Щербак С.С.

Львів-2023

Мета. Розробка програмно-інформаційного продукту засобами Python.

Умова завдань:

Завдання 1. Створити скрипт запуску лабораторних робіт 1-8 (Runner) з єдиним меню для управління додатками використовуючи патерн FACADE <https://refactoring.guru/uk/design-patterns/facade>.

Завдання 2. Зробити рефакторинг додатків, які були зроблені в лб 1-8, для підтримки можливості запуску через Runner .

Завдання 3. Зробити рефакторинг додатків, які були зроблені в лб 1-8, використовуючи багаторівневу архітектуру додатків (див. приклад нижче) та принципи об'єктно-орієнтованого підходу.

Завдання 4. Створити бібліотеку класів, які повторно використовуються у всіх лабораторних роботах та зробити рефакторинг додатків для підтримки цієї бібліотеки. Таких класів в бібліотеці має бути як найменш 5.

Завдання 5. Додати логування функцій в класи бібліотеки програмного продукту використовуючи <https://docs.python.org/uk/3/howto/logging.html>.

Завдання 6. Додати коментарі до програмного коду та сформувати документацію програмного продукту засобами roudoc. Документація має бути представлена у вигляді сторінок тексту на консолі, подана у веб-браузері та збережена у файлах HTML.

Завдання 7. Документація та код програмного продукту має бути розміщено в GIT-репозиторій.

Завдання 8. Проведіть статичний аналіз коду продукту засобами PYLINT <https://pylint.readthedocs.io/en/stable/> та виправте помилки, які були ідентифіковані. Первинний репорт з помилками додайте до звіту лабораторної роботи.

Завдання 9. Підготуйте звіт до лабораторної роботи.

Хід виконання:

Початкові зауваження бібліотеки Pylint.
